

Accelerated Kindergarten Program

Elements Montessori Kindergarten curriculum prepares the children for first grade in the next school year. Each student works at his/her own pace so that mastery of any particular concept is achieved. For Kindergartners who exhibit the readiness for advanced learning, we provide an accelerated kindergarten program to meet their enhanced learning needs.

The curriculum includes;

Accelerated Math: Basic operations, decimal system, understanding money, fractions, word problems, telling time, home works, workbooks and work sheets.

Accelerated Language: Phonetic awareness towards reading, synonyms/antonyms, story writing, punctuations, comprehension, creative writing, parts of speech (nouns, verbs, & adjectives), home works, work books and work sheets.

Science, Zoology and Botany: Magnetic and non-magnetic, buoyancy, living and non-living, herbivores, carnivores, omnivores, classification of animals, vertebrates and invertebrates, life cycles, solar system, and human body.

Geography: Continents, countries, states, animals of the world, land and water forms, cultural experiences includes introduction to traditions and celebrations.

Technology: As a 21st Century School, we introduce technology to our students according to their developmental level and interests. Our children need to enter today's world with a strong foundation in how to use technology. Elements Montessori classrooms are equipped with iPads to prepare children for the use of technology. Not only do these iPads support the administrative needs of the classroom, they also have Montessori educational apps available for children to use.
